# TropiGrow Proof-Backed Sponsorship

Sponsor a pilot. Support a garden. Receive a shareable proof-backed certificate.

Sponsor school gardens, community gardens, home garden kits, and tropical horticulture research pilots with clearer reporting.

TropiGrow has a live read-only Proof of Support certificate demo showing Support ID 2001 on TON testnet. The certificate verifies a hash-only support record without exposing private sponsor or participant information.

## Local packages + international opportunity

| | |
|---|---|
| **Mouty Managed Starter**<br>Local managed starter package for homeowners and small sites. | **Sprout Garden Support**<br>Support for home, school, and small community gardens. |
| **School Garden Proof Pilot**<br>Sponsor an educational garden with QR-ready proof reporting. | **International Proof Programme**<br>For diaspora, CSR, research, and institutional support partners. |

## What sponsors receive

- A shareable proof certificate URL after approved support activity.
- QR-ready verification for proposals, reports, and pilot updates.
- Hash-only proof reporting without sponsor PII on-chain.
- A path from local garden services to international proof-backed sponsorship.

## Jurisdiction-aware growth path

The current public proof demo is TON testnet and read-only. It is not a payment system, not a token sale, and not an investment product. Future international payment architecture may be developed through suitable jurisdictions, regulated partners, or non-custodial payment routing where appropriate.

**Sponsor a pilot. Support a garden.**
**Receive a proof-backed certificate.**
